

Micheal J.W. Ellis Sr.

Toledo, OH • 419-810-5050 • mike.ellis88@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

SUMMARY

Full Stack Developer with 10+ years building web applications with React, TypeScript, and Node/Express. Specializes in integrating LLMs into production applications — prompt templates, response validation, and guardrails for reliable, secure AI features. Experienced across enterprise authentication (Entra ID/SAML, Auth0, JWT) and role/permission-based access control.

CORE SKILLS

Frontend / App

- JavaScript (ES6+), TypeScript
- React, React Router, Next.js
- Node.js, Express, REST APIs
- MongoDB, Mongoose
- SQL (MySQL/HeidiSQL)

Backend / Platform

- LLM integration, prompt templates, response validation, guardrails
- AI-assisted development: Claude, Claude Code, Cursor, agentic workflows
- SSO/Auth: Entra ID (Azure AD), Auth0, SAML, OAuth2/OIDC, JWT
- RBAC/Permissions, Audit logging
- Azure MSAL, SharePoint file integrations
- Testing: Jest • Git/GitHub, Docker

EXPERIENCE

Kwest Group — Web Developer / Full Stack Developer

Perrysburg, OH • May 2022 – Present

- Built an LLM-powered assistant feature for internal users, including UI, API endpoints, and guardrails (input sanitization, restricted context, and logging) to support safe enterprise usage.
- Integrated LLM capabilities into internal web applications to automate/summarize workflows and generate structured outputs; implemented prompt templates and response validation to ensure reliable results.
- Built and maintained MERN-stack internal tools supporting equipment inventory, employee requests, form workflows, and reporting.
- Developed Node/Express APIs with domain-based routing, middleware patterns, and consistent REST shapes for CRUD + archive/unarchive operations.
- Implemented and maintained enterprise authentication/authorization flows including SSO (SAML) with Entra ID/Auth0 and JWT-based session handling.
- Enforced role/permission-based access controls (RBAC) and UI guards aligned with backend permission checks; partnered with stakeholders to map business processes to permissions.
- Integrated SharePoint file storage using Azure MSAL; implemented file upload/download patterns and validated MIME/size constraints.
- Added/maintained audit logging and change history snapshots to support traceability and compliance for data mutations.
- Delivered multiple iterations of the application stack, including more complex versions using TypeScript and Mithril.

Erie Construction — Software Engineer / Full Stack Developer

Toledo, OH • Aug 2020 – May 2022

- Rebuilt and maintained front-end experiences with responsive, mobile-first design and improved UX consistency.
- Developed and integrated RESTful services and database-backed features; collaborated with non-technical stakeholders to translate requirements into deliverables.
- Supported CI-friendly version control workflows and deployments; improved stability through bug fixes and incremental refactors.

Alro Steel Inc. — IT / Helpdesk Analyst / CAD Operator / Shift Supervisor

Jackson, MI • Jun 2017 – Aug 2020

- Provided tiered IT support for Windows environments, networking, and user access; resolved incidents and improved end-user productivity.
- Supported CAD operations and supervised shift workflows; coordinated cross-team communication in a production environment.

EDUCATION

- B.S., Software Engineering — Western Governors University
- A.A.S., CAD Technology — Owens Community College (Certified CAD Technician)
- Coding Boot Camp Certification — University of Texas at Austin
